

THE NEW MICRO SPRAY

Martin Lishman

Combining control and power with responsive easy handling, the Martin Lishman Micro-Spray pedestrian sprayer is designed for all types of sports grounds, golf courses and landscaping work. The Micro-Spray brings a new concept in spraying versatility to the groundsman's armoury.

The comprehensive yet easy to use control box gives the operator more control over the sprayer with changeable motor direction to either walk behind or in front of the sprayer, 12 motor speeds, bout marker selection and a battery level indicator.

Spray application rates, operating speed and the pump pressure can be accurately and quickly controlled by the operator.

The Micro-Spray has a narrow footprint so it can fit through most gateways and passageways to tackle hard to reach spraying areas.

Features

- 120 litre tank
- Break back
- 2.5m 6 nozzle, 3 section folding boom
- Independent shut-off nozzle bodies
- Reduced drift air inclusion nozzles
- Optional hand lance and a bout marker
- Boom height adjustment
